Gravity Roller Conveyors

Clark Handling offer a range of gravity roller conveyors for almost any application or industry. These gravity conveyors can offer a cost effective simple solution for most conveying requirements.

Many types of rollers and side frame materials are available including aluminium and stainless steel, to suit general, hygienic or food grade applications.

- Each section can be made as straight runs or bends, can be linked to power driven systems and can incorporate turntables, Ball Transfer tables and counter-balance access gates.

Expanding and Flexible Conveyors

Clark Handling offer a range of mobile Expanding and Flexible conveyors. Each can be simply wheeled out and expanded in either straight or bend sections. When finished using just close the unit up and store away.

This flexible system has lattice side-frames which enable it to be stretched. These units can be used either on their own or to supplement existing installations in stores, warehouses or assembly lines. Each unit can be fitted with low inertia plastic or steel skate-wheels, plastic or steel rollers.

- Standard widths are available from 300-1500mm.
- Telescopic height adjustable leg supports fitted as standard.

Belt Conveyors

Clark Handling offer a wide selection of powered belt conveyors manufactured to a very high specification. A wide range of sizes, drive configurations and finishes cater for any application.

All types of belt finishes and belt materials are available, smooth belt, and grip top belts for standard handling requirements, heavy duty, fire retardant and food quality belts. The comprehensive range includes all types of drive

units individually designed for the purpose required. These include end drives, integral drum drives and variations of centre drives.

Features include

- Horizontal, inclines, interfloor mezzanine, flighted and mini belt conveyors. All manufactured using either mild steel powder coated or stainless steel construction.
- Integral drum drive, centre mounted, side mounted and underslung conveyor drives.
- Many electrical options available including variable speed, stop/start/reverse controls and photo electric cells

Conveyor Systems

Clark Handling offer a wide range of power driven roller conveyors to compliment its range, allowing the supply, design and installation of a complete conveyor system. The powered roller conveyor includes accumulation lineshaft, positive chain driven roller and positive contact belt under rollers. All these conveyors are supplied in modular sections, flexibility in design ensure ease of installation, which allow future extension to any system.

In addition to standard bends, corners, merges and gates we include many pneumatically operated options such as intermediate stops, brakes and transfers.

Vehicle Loading

Clark Handling offer a wide range of conveyors designed to load/unload vehicles and containers. The range comprises of various models of mobile powered loaders and gravity telescopic conveyors.
